Subject: 8-26 Fishmarket Road, Rye: update
Statement received from Tony Leonard, RDC Director of Services:

The current situation is that the Council has obtained a structural engineers report regarding the works necessary to stabilize the cliff. Following the receipt of this report the District Valuer has been consulted regarding the value of the site. Once the District Valuers report has been received the matter will be reported to Cabinet to enable a decision to be taken as to what action they would like to see.
